

Watco Pools is our number one choice for pool chemicals, trouble-shooting and service. I have always had the most professional sales and customer service with Watco and if I need something that day, it is here that day. Recently we discovered we had a leak in one of our pools. We assumed the leak was going under the foundation of the building but we did not know where the pool was leaking from. Watco was down here as soon as possible. They were very thorough in checking our system and found the leak and had it fixed within a week. We consider Watco and its employee's friends and family.

The City of Kalispell has been a customer of Watco Pools for the last 5+ years and couldn't be more pleased about their customer service, pool maintenance and pool refurbishment capabilities. They really pay attention to their clients' needs, react quickly to problems, and are extremely reliable. Any time we have had a question, concern or problem, they have just been a phone call away and a solution or answer is provided within a day or two or even the same day. We really appreciate all they do for us.
